DETAILED ACTION

1. The amendments filed on 11/29/99 and 6/2/2000; the information disclosure statements filed on 11/15/00, 1/9/01, 2/6/01, 8/9/01 all have been entered. Claims 168-245 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 168 and 199 are rejected under 35 U.S.C. § 102(b) as anticipated by Wellner [5,640,193].

Wellner discloses a system which allows multimedia service access by reading marks on an object. Specifically, Wellner discloses a scanner 11 for reading bar codes [see summary of the invention, col. 2]. The scanned data is decoded into a request and communicated to server 13 for handing the decoded request. In col. 4, lines 30-35, Wellner discloses that the bar codes work similar to URL identifiers. The transceiver 12 as shown in Fig. 2 of Wellner serves as the claimed telecommunication means. The claim differs in calling for an Internet Server which is operably connected to the bar code reader. As can be seen, Wellner discloses the claimed invention.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 169-198, and 200-245 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wellner [5,640,193] in The system as taught by Wellner has been discussed above. However, Wellner fails to disclose the use of various type of communication means, storage means, display means, etc. as recited collectively in claims 169-198 and 200-245. It is noted that Wellner disclose the method of retrieving information over an Internet server or a telecommunication network.

Reference to Walsh discloses the use of a low power hand held terminal allowing user to retrieve information from a remote location. Walsh is cited as evidence showing the conventionality of the use of wireless network, storage means, etc., in information retrieval system. It would have been obvious to implement Walsh's teaching in Wellner's teaching. The modification increases versatility and extends the applications of Wellner's system. Further, the modifications are notorious well known and would have been well within the skill levels and expectations of an ordinary skilled artisan, view of Walsh et al. (herein Walsh - 6,144,848).
